Working as a cohesive force with organizational management solutions by Nakisa

Policing and law enforcement in Israel are the sole responsibility of the Israel Police. With 30,000 employees this national force is responsible for all aspects of policing, including crime prevention, public security and maintaining law and order.

The challenge

Needing to optimize resources in an ever changing and sometimes sensitive environment, Israel Police's HR team needed a modern system that could provide a complete overview of the workforce so that it could be easily visualized and effectively managed in real-time. The new system needed to be intuitive and visually appealing as well as easily deployed to a large number of non-professional users.

Nakisa's Organizational Management solutions, integrated with SAP, offered a centralized and efficient solution enabling the force to visualize the organizational structure for more effective resource allocation. Implemented in only 20 days by Nakisa partner Julius IT Boutique, the solution enabled Israel Police to truly work as a cohesive force. By providing the ability to deploy resources where they are needed most, Israel Police can better safeguard civic society within the state of Israel.

“

Implementation of Nakisa® OrgHub™ enabled visibility throughout our complex organization and helped us gain a deep understanding of our organizational structure. Using Nakisa helped us bringing business value to the organization in quick implementation process.

Shay Cooperman, Head Technological Division,
Brigadier General, Israel Police

”

EXECUTIVE OVERVIEW

Objectives:

- Visualize the organizational structure to provide transparency for the workforce and better manage resources.
- Implement an easy to use, visually appealing system that can be quickly deployed to a large number of non-professional users.
- Achieve seamless integration with SAP HCM as part of a wider SAP upgrade and system modernization.

The solution:

SAP® Organizational Visualization by Nakisa offers a centralized and efficient solution enabling the force to visualize the organizational structure for more effective collaboration and resource allocation.

Benefits:

- Providing a comprehensive and accurate view of the organization, Israel Police now has a real-time view of the workforce for optimal resource and budget management.
- Visibility into the organization structure enables better communication & alignment.
- Fully integrated with SAP the solution was successfully deployed by Julius IT to a large number of users in only 20 days with plans to implement more solutions.

TOP BENEFITS ACHIEVED

Optimized A real-time, accurate view of the organization enables resource optimization.

Aligned Organizational visibility promotes communication & alignment.

Efficient Quickly deployed to a large number of users in only 20 days.
