

Lease Administration by NAKISA®

Smarter Lease Management & Compliance With ASC 842 and IFRS 16

End-to-end Lease Management

Lease Administration by NAKISA® is an enterprise-class lease management and accounting solution that accelerates compliance with the new (**ASC 842, IFRS 16**) and current (**ASC 840, IAS-17**) leasing standards. Lease Administration by NAKISA® delivers both compliance and smarter lease management in a solution that natively integrates with your existing ERP and financial systems.

Lease Administration by NAKISA® acts as a central repository for all of your lease data, including detailed dashboards and reporting.

With a built-in lease management and accounting workflow, Lease Administration by NAKISA® offers increased efficiency and higher return on lease management processes.

Out-of-the-box, native integration with SAP Asset Accounting (**AA**), General Ledger (**GL**), Accounts Payable (**AP**), Plant Maintenance (**PM**), and **SAP** master data tables means businesses see an overall reduction in implementation time, risk and cost of ownership.

Lease Administration by NAKISA® is SAP Premium qualified and is sold and supported by SAP as **SAP Lease Administration by NAKISA®**.

SAP®
Solution
Extension

SAP® Certified
SAP HANA® Cloud Application

Benefits

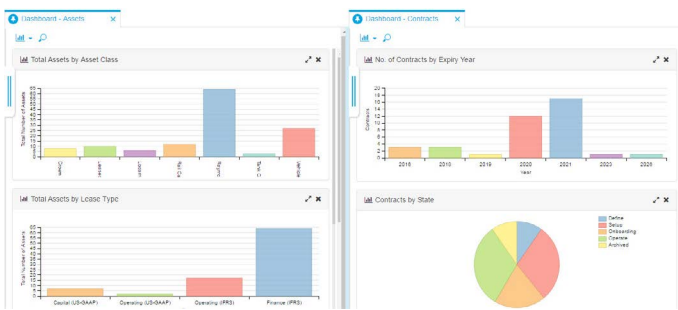

-  **Automate**
operating and finance lease accounting
-  **Enable**
compliance with current and new lease accounting standards and provides necessary disclosure reports
-  **Quickly**
generate disclosure reports for ASC 840, ASC 842, IAS-17, and IFRS 16 with the click of a button

all leases in a single solution that leverages master data directly from the source, avoiding redundancy and increasing data accuracy
-  **Avoid unwanted**
penalties from missed payments and evergreen fees

360° Operating and Finance Lease Management Solution

Get a complete lease accounting solution in a single platform

Following the new five-step process for Complete lease lifecycle accounting including: lease classification and amortization, right-of-use and liability asset calculation, accruals and payments, event management, audit trail, Disclosure reports and more...

Visualize your entire lease portfolio

With intuitive pre-configured dashboards that breakdown the composition of your contract portfolio by contract status, payment obligations, asset classes, vendors, etc.

Create disclosure reports

that comply with ASC 842 and IFRS 16, and visualize their impact on your financial statements over time.

Accelerate Data Collection

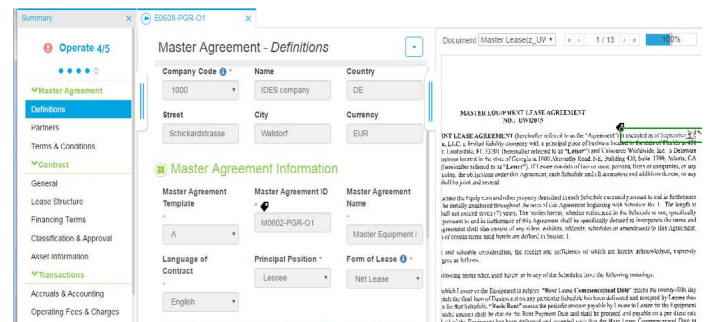

that enable predefine fields, quick data import, export and integration from various sources.

Leverage existing data

including Asset Accounting, Accounts Payable, Material Management and Plant Maintenance to create full visibility of equipment installation, usage and casualties throughout equipment lifecycle.

Be strategic in the administration of your lease operations

by gaining insight into the life cycle of contracts, tracking key dates (renewals, expirations, etc.) and analyzing the financial implications for your business.

Revenue Recognition Module

SAP's Lease Administration includes NAKISA®'s Revenue Recognition solution which enables analysis and assessment of revenue contract data. Reduce the time and cost of performing assessments by providing end-user productivity tools, enterprise collaboration tools, and complete audit trails for all activities.

The deadline for complying with the new standards is fast approaching.

Act now, save time, and avoid unwanted extra costs.
